EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Kyle B. Rinehart, on April 28, 2006.

3. The application has been amended as follows:

-see attached sheets

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

2. The examiner considered the Applicant's Amendment filed on 2-08-2006, and after updated search, no other prior art of record has taught that which was presented in the amended claims.

3. Therefore, amended claims 1-7, 9-13, 15, 16, 18, 19, 21-30, and 42-71 which placed the previously objected subject matter of claims 3-5, 8, and 49 into the previously rejected claims 1, 13, 27, 51, 61, and 69, are allowable, along with the corresponding dependents.

4. Independent claims 1, 13, 27, 51, 61, and 69, when considered as a whole, are allowable over the prior art of record. Marmel teaches, on pages 8, 50, and 51, presenting a schedule, including one or more sub elements, in the form of a Gantt chart

Art Unit: 2173

where the chart can display only the top level structure, on page 263, the 9/3 and 8/27 not being relative to the upper timeline but to its own line, on pages 263 and 264, the date labels of the Gantt chart, in figure 9-12 ("8/25", "10/14", "8/27", and "8/18") are not relative to the top level schedule, it is further noted on page 264, that dates are shown in Gantt bars. Marmel, teaches the limitation as cited above, but Elliott teaches a loop structure that more closely resembles that of the claims (see Elliott, Part III, section 3.5 and Part I, in the figure below section 6.5), here Elliott teaches a Gantt chart comprising a loop structure where control step timing within the first loop is relative to the first loop schedule (this can be seen in the diagram where the user has traced through the architecture selecting a view by loop display).

However, specifically the prior art of record fails to clearly teach or support the limitation of the Gantt chart having an embedded loop structure that has its own set of control step timing independent from the overall timing of the Gantt chart.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
